

Jeffrey William Hollister Curriculum Vitae

U.S. Environmental Protection Agency
Atlantic Ecology Division
27 Tarzwell Drive
Narragansett, RI 02882
cell: 401.556.4087
office: 401.782.9655
email: Hollister.Jeff@epa.gov

Education:

Doctor of Philosophy in Environmental Science, December 2004

Department of Natural Resources Science, University of Rhode Island, Kingston, RI

Areas of emphasis: Landscape Ecology, Geospatial Sciences, and Environmental Monitoring

Coursework in: Coastal Ecology, Geographic Information Systems, Landscape Ecology, and Statistics

Dissertation Topic: Predicting Condition of Small Estuarine Systems along the United States' Atlantic Coast. (Advisor: Peter V. August, Ph. D.)

Master of Environmental Management, May 1997

Nicholas School of the Environment, Duke University, Durham, NC

Areas of emphasis: Resource Ecology, Landscape Ecology, and Geospatial Sciences

Coursework in: Ecology, Geographic Information Systems, Remote Sensing, Landscape Ecology, Spatial Statistics and Analysis, Conservation Biology, Statistics, and Forest Ecology

Master's project: An Analysis of Red Spruce Establishment Success in Highland County, Virginia. (Advisor: Patrick N. Halpin, Ph. D.)

Bachelor of Science, Magna Cum Laude, May 1995

Baker University, Baldwin City, KS

Major: Biology with emphasis in ecology. (Advisor: Roger L. Boyd, Ph.D.)

Appointments:

- | | |
|----------------------|--|
| Aug 2008 - Present | <i>Research Ecologist</i> , US Environmental Protection Agency, Atlantic Ecology Division, Narragansett, RI |
| Jan 2007 – Present | <i>Adjunct Assistant Professor</i> , Department of Natural Resources Science, University of Rhode Island, Kingston, RI |
| Dec 2005 – Present | <i>Senior Fellow</i> , Coastal Institute, University of Rhode Island, Narragansett, RI |
| May 2006 – July 2008 | <i>Postdoctoral Landscape Ecologist</i> , US Environmental Protection Agency, Atlantic Ecology Division, Narragansett, RI |
| Aug 2005 – May 2006 | <i>Postdoctoral Teaching Fellow</i> , Department of Science, Marine Science Section, U.S. Coast Guard Academy, New London, CT |
| Jan 2005 – July 2005 | <i>Postdoctoral Associate</i> , American Institute of Biological Sciences, National Ecological Observatory Network (NEON) Project Office, Washington, DC |
| Jan 2004 – Dec 2004 | <i>Departmental Webmaster</i> , Department of Natural Resources Science, University of Rhode Island, Kingston, RI |
| Sep 2002 – Dec 2004 | <i>Graduate Teaching Assistant</i> , Department of Natural Resources Science, University of Rhode Island, Kingston, RI |

- May 2003 – Aug 2004 *Geographic Information Systems/Biological Database Consultant*, Rhode Island Natural History Survey (RINHS), Kingston, RI
- Jan 2001 – June 2001 *Geographic Information Systems Consultant*, Save the Bay, Inc. Kingston, RI
- Sep 2000 – Sep 2002 *Graduate Research Assistant*, Department of Natural Resources Science, University of Rhode Island, Kingston, RI
- Sep 2000 – Sep 2002 *Predoctoral Fellow*, USEPA Atlantic Ecology Division/University of Rhode Island Northeast Environmental Research Training Program, Narragansett, RI/Kingston, RI
- June 1998 – July 2000 *Lead Research Technician in Landscape Ecology*, Landscape Ecology Lab, Joseph W. Jones Ecological Research Center, Newton, GA
- Aug 1997 – Jan 1998 *Geographic Information Systems Specialist*, Research Triangle Institute, Research Triangle Park, NC

Research:

Statement of Research Interests: It is my general research philosophy to conduct nationally relevant research and apply the results of that research to locally important issues. Both levels of research serve to inform environmental policy, guide restoration and conservation activities, and advance the design of monitoring programs. Towards that end, I hope to contribute to research in landscape ecology, geospatial technologies (e.g. geographic information systems, spatial statistics, and remote sensing),ecoinformatics/reproducible research, and broad scale environmental monitoring and modeling. Specifically, I wish to continue my past work and use broad scale monitoring data (e.g. Environmental Monitoring and Assessment Program data (EMAP), National Land Cover Dataset (NLCD)) to explore the links between landscape structure (e.g. landscape composition and configuration) and the ecological health and integrity of receiving waters, primarily estuaries. Furthermore, I am interested in applying the theories of landscape ecology to understanding how and where ecosystems provide the necessary function to support a wide array of ecosystem services.

Research and Professional Experience:

Aug 2008 - Present *Research Ecologist*, U.S. Environmental Protection Agency, Atlantic Ecology Division, Narragansett, RI

Serves as principle investigator and provided leadership to the division on landscape ecological research and application of geospatial sciences to the understanding of how spatial patterns in landscapes and ecosystems impact the condition of ecological resources (e.g., water quality in fresh and estuarine waters) and control the delivery of services to society. Developing tools and methodologies (GIS and statistical) using numerous software packages and languages (R, ArcGIS, GRASS, Python, MS Excel) Continued prior research on technology transfer of data, analytical methods and predictive tools to Northeast States; and developed statistical and modeling tools to facilitate use of defensible techniques in water quality criteria development. Currently serving as Co-lead on project studying ecosystem services related to nutrient cycling in Northeastern lakes and ponds and am liaison between the National Ecological Observatory Network (NEON) and EPA's Ecosystem Services Research Program (ESRP).

May 2006 – July 2008 *Postdoctoral Landscape Ecologist*, U.S. Environmental Protection Agency, Atlantic Ecology Division, Narragansett, RI

Contributed to research and technology transfer of National Coastal Assessment data, analytical methods and predictive tools to Northeast States. Developed statistical and modeling tools (e.g. Conditional Probability Analysis with R and Excel) to facilitate use of defensible techniques in water quality criteria development. Provided Landscape Ecology, Spatial Statistics and GIS support to a variety of ongoing projects at the Atlantic

Ecology Division and within US EPA's Office of Research and Development. Explored linkages between landscape and downstream receiving waters and examined utility of broad scale monitoring data in identifying and assessing ecological impairment.

Aug 2005 – May 2006 *Postdoctoral Fellow*, U.S. Coast Guard Academy, Dep. of Science, Marine Sciences Section, New London, CT

Continued prior research on multi-scale interactions between landscape structure (via NLCD) and sediment metal concentrations (via EMAP) and predictive modeling of estuarine impairment. Worked with students, faculty and colleagues in the Marine Sciences Section, the International Ice Patrol, and Information Services Division on a wide variety of Geographic Information Systems projects.

Jan 2005 – July 2005 *Postdoctoral Associate*, American Institute of Biological Sciences, National Ecological Observatory (NEON) Project Office, Washington, DC

Researched and assisted in planning of ecological observatories designed to address the National Research Councils Environmental Grand Challenges. Made specific contributions in the design of the land use change component of NEON and design of a Multi-Scaled Remote Sensing System designed to support and develop NEON analytical tools and ecological forecasting models. Other duties included managing Geographic Information Systems operations in the Project Office, maintaining the NEON web presence (<http://www.neoninc.org>), interacting with research scientists and educators on the NEON Senior Management Team and National Network Design Committee, and assisting with the day-to-day operations of the NEON Project Office.

Sep 2000 – Dec 2004 *U.S. EPA/URI Pre-doctoral Fellow/Doctoral Research/Graduate Research Assistant*, USEPA Atlantic Ecology Division/University of Rhode Island Northeast Environmental Research Training Program, Narragansett, RI/Kingston, RI

Used monitoring data from the Environmental Monitoring and Assessment Program (EMAP) and the National Land Cover Dataset (NLCD) to explore relationships between landscape structure and indicators of estuarine condition. I specifically researched the accuracy of the NLCD at multiple spatial scales, the role of spatial scale on the relationship between landscape organization (e.g. landscape composition) and ecological health and integrity of Atlantic coast estuaries, and built predictive models of estuarine condition designed to locate estuaries with impacted ecological integrity. As member of Landscape Ecology Working Group, discussed and assisted on projects at USEPA Atlantic Ecology Division and URI utilizing landscape ecology, spatial analysis and broad scale environmental monitoring data, in particular NLCD and EMAP.

May 2003 – Aug 2004 *Geographic Information Systems/Biological Database Specialist*, Rhode Island Natural History Survey, Kingston, RI

Contributed towards the design and implementation of the Rhode Island Natural History Survey (RINHS) Biodiversity Databases, specifically the Odonata of Rhode Island and the Biota of Rhode Island. Designed field sampling methodology to accurately map invasive species with geostatistical techniques.

Jan 2001 – June 2001 *Geographic Information System/Eelgrass Restoration Modeling Consultant*, Save the Bay, Inc., Kingston, RI

Compiled bathymetry, current and historic eelgrass locations, historic, and water quality data sets for use in eelgrass restoration efforts. Using the Short et al. (2002) methodology, built geographic information system models of eelgrass restoration

potential and generated maps of areas in Narragansett Bay with higher potential of eelgrass restoration success.

June 1998 – July 2000 *Lead Research Technician in Landscape Ecology*, J.W. Jones Ecological Research Center, Landscape Ecology Lab, Newton, GA

Conducted research on ecological impacts of small wetland loss in the Southeastern United States, use of home range in the design of gopher tortoise (*Gopherus polyphemus*) reserves, and habitat use and landscape ecology of Northern Bobwhite Quail. Other research duties included remote sensing data analysis (e.g. Landsat Thematic Mapper, SPOT-XS, B&W and CIR Aerial Photography), analysis of vector and raster GIS data, and field data collection (e.g. GPS, vegetation data). Supervised and assisted other technicians, graduate students and summer field workers and managed day-to-day operations of the Landscape Ecology Lab.

Aug 1997 – Jan 1998 *Geographic Information Systems Specialist*, Research Triangle Institute, Research Triangle Park, NC

Developed a GIS methodology and series of Arc Macro Language scripts to facilitate the identification of river reaches, as required by the Clean Water Act, in the states of North Dakota and Arkansas.

May 1996 – July 1997 *Resource Ecology Master's Research*, Duke University, Landscape Ecology Lab, Durham, NC

Researched environmental, ecological, and spatial controls on the establishment success of Red Spruce (*Picea rubens*) in northwestern Virginia. Research techniques included a variety of geographic information systems analytical tools (e.g. Topographic Convergence Index) and spatial statistics techniques (e.g. partial mantel's tests).

Teaching:

Jan 2007 – May 2007 *Adjunct Assistant Professor*, University of Rhode Island, Department of Natural Resources Science, Kingston, RI

Team taught, with Dr. Peter V. August, Ecology of Fragmented Landscapes (NRS 534) a graduate level seminar course in Landscape Ecology. Course included readings and group discussion of the concepts and principles of landscape ecology.

Aug 2005 – May 2006 *Postdoctoral Teaching Fellow*, U.S. Coast Guard Academy, Department of Science, Marine Sciences Section, New London, CT

Responsible for teaching 3 laboratory sections of Introduction to Geospatial Sciences (major topics include: introduction to ESRI products, geospatial data management, spatial analysis, cartography, coordinate systems and projections, geodatabases, development of geodatabase for emergency management and hazardous materials response) and teaching 3 sections of a core course in Oceanography (major topics include: marine and coastal ecology, fisheries, meteorology, physical oceanography, coastal oceanography, estuarine classification, and oil spill impact/response).

Sep 2002 – Dec 2004 *Graduate Teaching Assistant*, University of Rhode Island, Department of Natural Resource Science, Kingston, RI

Coordinated Conservation of Populations and Ecosystems course (major topics include: conservation biology, ecological and socioeconomic importance of biodiversity, introductory population, community, and ecosystems ecology, genetics, metapopulations, landscape ecology, and data analysis for conservation biology). Taught laboratory

sections for Fundamentals of Geographic Information Systems (major topics include: operating systems essentials for GIS, ArcInfo Workstation, Editing and creating spatial data, cartography, and introductory spatial analysis).

May 2003 – Aug 2004 *Geographic Information Systems/Database Consultant*, Rhode Island Natural History Survey, Kingston, RI

Provided training to Rhode Island Natural History Survey and Ecological Inventory and Monitoring Stewardship Program Staff on ArcView and ArcMap GIS and Trimble GPS. Training focused on use of these products for ecological and natural history applications.

June 2001 *Geographic Information Systems Consultant*, National Park Service, Gateway National Recreation Area, Staten Island, NY

Trained Gateway National Recreation Area staff in use of ArcView, Spatial Analyst, and Trimble GPS products.

Grants:

- Geospatial Statistical Analysis Seminar, A Cooperative Training Project Between the University of Rhode Island and the US EPA Atlantic Ecology Division, US EPA NHEERL Grant, June 2003. PI's: P. August, L. González; Co-PI's: R. Sand, J. Opaluch, J. Hollister, and D. Grossman-Garber.
- Estuarine Condition and Landscape Structure Relationships in the Mid-Atlantic and Southern New England Regions of the United States, EPA/URI Pre-Doctoral Fellowship (Major Advisor: Peter V. August, EPA Mentor: John F. Paul).

Awards:

- 2010 ESRI International Users Conference, First Place Poster in Software Integration.
- 2007 USEPA, National Health and Environmental Effects Laboratory, Strategic Goal 4 Award: Science Integration –Interdivisional Laboratory Research, Received with Eric Weissberger, Anita Morzillo, Janet Nestelrode, and John Paul.
- 2006 USEPA, Atlantic Ecology Division, On The Spot Award, Contributions to SABS Workshop
- 2003 Best Student Presentation, North Atlantic Chapter of the Society of Environmental Toxicology and Chemistry 9th Annual Meeting, Mystic CT
- 2003 Rhode Island Surfrider Foundation Robert Lloyd Scholarship
- 2001 NASA-MSU Professional Enhancement Award
- Phi Eta Sigma National Honor Society
- Blue Key National Honor Society

Graduate Advising and Committees:

- Kylie Bishop, 2008, Ph. D. Thesis Defense Committee, Deakin University, Warrnambool, Australia
- Ann Borowik, 2008, Masters of Environmental Science and Management Written Comprehensive Exam Committee, University of Rhode Island, Kingston, RI

Professional Activities:

- Liaison between USEPA's Ecosystem Services Research Program (ESRP) and the National Ecological Observatory Network (NEON).
- Provided Peer Review for: *Trends in Ecology and Evolution*, *Plant Ecology*, *Integrated Environmental Assessment and Management*, *Remote Sensing of Environment*, *Journal of Environmental Quality*, *Selbyana*, Minnesota Sea Grant, and numerous USEPA Office of Research and Development internal reviews.
- List administrator for R-sig-ecology, a Special Interest Group mailing list on the use R in Ecology.
- Participated in the Causal Analysis/Diagnosis Decision Information System (CADDIS) Planning Retreat at Hueston Woods Conference Center, Oxford, OH, April 30 – June 3.
- Co-organized (along with Jason Grear, Suzy Ayzavian, Peter August and Deb Coty) a short course by David Anderson entitled, "Information Theoretic Model Selection and Multimodel Inference in Science and Management", March 28-29, URI Coastal Institute, Narragansett, RI.
- Section Editor, "Ecology on the Web" Department of the Bulletin of the Ecological Society of America, Feb 2007 - Present
- Attended Science Environment for Ecological Knowledge (SEEK) Postdoctoral and New Faculty Training in econinformatics: Jan 8-12, 2007, University of New Mexico.
- Graduate Student Representative to Department of Natural Resources Science at the University of Rhode Island for 4 years
- Graduate student representative at URI-ADVANCE workshops with Department of Natural Resources Science at the University of Rhode Island
- Helped draft a Diversity Statement for Department of Natural Resources Science at the University of Rhode Island
- Assisted with compiling links of software and graduate programs in spatial ecology for the US-IALE web page (<http://www.usiale.org/rellinks.htm>).

Society Memberships and Committees:

- US Chapter of the International Association of Landscape Ecology
 - Program Chair, 2012 Annual Meeting
 - Strategic Planning Committee
 - Awards Committee
- Society for Conservation GIS
- Ecological Society of America
- Rhode Island Natural History Survey
- Northeast Arc Users Group
 - Host Committee and Social Chair for 2010 Northeast Arc Users Group annual meeting in Newport, RI.
 - Chair, Poster session 2006 Northeast Arc Users Group annual meeting in Mystic, CT
 - Host Committee for 2006 Northeast Arc Users Group annual meeting in Mystic, CT

Software and Computing Skills:

- Geographic Information Systems: approximately 12 years experience with ArcGIS, Arc/INFO, ArcView; approximately 3 years experience with Geostatistical Analyst; approximately 1 year experience with ArcIMS and ArcGIS Server
- Remote Sensing: approximately 3 years experience with ERDAS Imagine
- GPS: approximately 2 years experience with Trimble ProXR, Trimble GeoExplorer, Trimble GeoXT, Trimble Pathfinder Office
- Statistics: approximately 5 years experience with SAS; approximately 3 years experience with R, approximately 2 years experience with SPSS; approximately 1 year experience with S-Plus, and SigmaPlot
